

# TTII TRU-PLAY 57 COLORED EPDM

*Safety • Durability • Quality*

TTII TRU-PLAY 57 COLORED EPDM INFILL is a 100% virgin EPDM with a long-term color stabilization package which ensures constant color fastness throughout the entire granule.

The under-water extrusion process produces a semi-ovoid shape achieving higher product durability, better compression set, longer elasticity and minimal loss of infill due to wear over the life of the field. The special shape and specific gravity of minimum 1.45 reduces the fly zone and will not allow particle floatation in heavy rains. It excels in hot weather too - our EPDM will not agglomerate at temperatures up to 239° F.

TTII TRU-PLAY 57 COLORED EPDM INFILL is North American made, ISO certified, has no odor and no dust. Our EPDM meets California's Prop 65 and the EN71-3 European Toy Test affirming its safety to the environment and the SAFETY and HEALTH to all that play on it.

Available in Green & Tan

TTII offers an 8 year manufacturer's warranty and a 100% recycling program after the life-cycle of the field.

---

We strive to offer the highest-quality products keeping safety for the player and the environment always forefront for the sports fields, parks and recreation, commercial and residential markets.
